

Easter Egg Teardown

An Easter egg torn apart for your pleasure.

Written By: Miroslav Djuric

INTRODUCTION

I delve into an Easter egg just to see what makes this funky pink thing tick.

TOOLS:

- [Kitchen Knife](#) (1)
-

Step 1 — Easter Egg Teardown

- So let's find out what's inside this DELICIOUS-looking Easter egg.

Step 2

- First step - cut into the egg.
- I wonder what kinds of things I'll find inside? Leprechauns? Little bunnies? The true meaning of [Easter](#)? Only time will tell.

Step 3

- The innards reveal a yellowy substance. Not sure what it is, but let's dig into it some more and see if we can find out.

Step 4

- Another cut is made, more yellow is found.
- Surprisingly, no [processors](#) have so far been found. No bunnies for that matter, either.

Step 5

- Two halves exposed... But what's the yellow stuff? Only one way to find out.
- Current bill of materials:
 - Yellow mystery stuff inside
 - Pink outer layer
 - Blue swirls
 - Yellow dots
 - Red Swirls
 - Green swirls

Step 6

- A formal analysis found that the yellow inner filling was, in fact, yellow cake.
- Conclusion: Easter eggs rock!

To reassemble your device, follow these instructions in reverse order.
